

PJP CONSTRUCT

CAPABILITY STATEMENT

ABOUT US

COMMITTED TO OUR CLIENTS

PJP Construct is a multifaceted construction company based on the Sunshine Coast. We have been working with our clients for over 10 years to deliver quality construction projects throughout Queensland.

Our team of qualified tradesmen and skilled office staff are supported by trusted trade professionals and suppliers. This means we can offer end-to-end solutions in insurance repairs and rebuilds, new residential builds or renovations and commercial projects. We are committed to exceeding our clients' expectations while delivering a quality outcome.

As we continue to grow, we are committed to remaining true to the foundations of our business — our versatility and customer focus.

CORE COMPETENCIES

THE PJP DIFFERENCE

WE'RE VERSATILE

Whether it's an insurable event, new residential build, renovation or commercial project, we have streamlined our business around managing the complete process from start to finish, making our clients' lives easier.

WE'RE RELIABLE

Working in an unpredictable industry, we understand the need to adapt to situations in a fast and efficient manner. Our team is committed to providing a high standard of workmanship with minimal disruption to our clients.

WE'RE HONEST

Our customers are integral to the success of our business, and we understand the importance of being upfront and maintaining open communication. It is our priority to ensure our clients are kept up to date throughout all stages of their project.

SERVICES

INSURANCE RELATED EVENTS

PJP Construct is the complete service solution when it comes to managing and providing the repairs required after an event occurs. Backed by years of experience, our team of supervisors, estimators and highly skilled tradespeople are committed to consistently delivering quality repairs on time and within budget — without compromising on safety.

MAKE SAFE REPAIRS

We understand that disaster can strike at any time. That's why we are equipped to dispatch our teams and coordinate trades to assist in providing temporary repairs at any time. This prevents any further damage from occurring until further assessment and permanent repairs can be completed.

REPORTS & ASSESSMENTS

After an event has occurred, our qualified assessors will investigate the extent and cause of the damage and provide comprehensive reporting that includes property assessments, roof reports, causation statements and quotes. We also provide specialist reports in the form of Leak Detection testing and Aerial Drone assessments.

ROOF REPLACEMENTS

Metal roof replacements are one of our core business services and we have extensive experience working with our clients on residential and commercial properties. Combined with an in-house edge protection team and associated trades, we are well-versed in managing all aspects of the roof repair, saving our clients the hassle of dealing with multiple trades on the one project.

REPAIRS, REBUILDS & RESTORATION

The extent of our services ranges from minor damage claims to major loss repairs, including rebuilds to residential and commercial buildings. As a company, we have proven capability in repairing damages caused by storms, water, fire, impact, and malicious intent. Regardless of the extent of the repairs required, our QBCC licensed builders and supervisors will work alongside our network of expert trades to deliver a high standard service with minimal disruption to the home or business owners.

NEW BUILDS & RENOVATIONS

Many of us at PJP started our careers working on new builds and renovations. It's where we honed our skills and so both hold a special place in our hearts. With over two decades of experience in projects ranging from high-end architectural builds to budget renovations, there isn't anything we can't do. At the moment this is a speciality service as our focus is currently on insurance-related events. However, we still take great satisfaction in turning concepts into reality and creating dream homes for our private clients.

NEW ROOFS

Our roofing services also extend to all facets of new roof installations. Offering expertise and efficiency, PJP aims to provide the best possible outcome for any roof — new or old.
